MILLS COUNTY PUBLIC HEALTH ANNOUNCES OFFICE RELOCATION

Mills County Public Health will be moving to larger office space effective Friday, January 13, 2012. The new building is located one block from their current location on the grounds of the Glenwood Resource Center. The new street address is 212 Independence; however, the telephone number, email addresses and mailing address will be unchanged.

“We are excited about this opportunity to move into larger, more modern office space” said Sheri Bowen, Agency Administrator. “We are doubling our current floor space and will be able to add a dedicated classroom and playroom area. This will be a tremendous asset to our ability to provide classes and community activities on-site. There will be no disruption of agency services during the move. We look forward to serving the needs of Mills County residents in our new location.”

Donations are needed to help furnish the playroom facility. If you have gently used toys and play equipment for children ages 5 and under, please contact us. You can reach Mills County Public Health by phone 527-9699 with any questions or check out our website at www.mcph.millscoia.us for directions to the new facility.
